

Maximo[®] eLearning

Projetechn eLearning Management System

The Projetechn Maximo[®] eLearning Management System (eLMS) provides students a portal to high quality online Maximo training. From this site, you may view our Maximo Course Catalog and details regarding courses offered. If you choose to enroll in a course, it is quite simple! Select the course(s) from the Catalog listing by checking the “Enroll” box next to the course. You will be taken to the Pay Pal site for payment information and processing. Once payment has been received, you may take your course immediately or anytime within 90 days of purchase. Our courses are reasonably priced and are a cost-effective solution to traditional classroom training.

We offer **Self Paced Online Learning (SPOL)** which allows the student to take the course at his/her own pace. SPOL courses are demonstration-style and include simulations to allow students to practice what they have learned. At the end of each SPOL course, a 10 question Knowledge Review is provided. The student may retake the course as many times as they would like for up to 90 days from purchase.

We also offer **Instructor Led Online** courses (ILO) which provides real-time access to an industry experienced Maximo instructor. During an ILO course, the student will be provided with access to a working Maximo application and database in which they may perform course exercises. The student may ask for instructor assistance throughout the course and, at dedicated times, the instructor can provide one-on-one instruction to the student.

The Projetechn eLMS will record your enrollment and completion information for each course in which you have enrolled. You may view your course history at any time.

First time users may sign into the Projetechn Maximo eLMS, by simply going to www.maximolearning.com from their Internet Browser program and clicking the **“New User? Sign Up Here”** link.

Once you have provided a user name and password, you may log into the Projetechnology eLMS at anytime to browse our course catalog, purchase or take a course in which you have enrolled.

Feel free to take a test drive by enrolling in our free demonstration course available from our eLMS. The demonstration is a sample from a *real* SPOL course.

Projetechnology is working diligently to update our course offerings, so if you don't see what you need, check back frequently. Of course, we still offer the traditional classroom style Maximo courses. Check the Projetechnology website www.projetechnology.com at any time for up to date course listings!

For further information regarding our courses or schedules, please send an inquiry to training@projetechnology.com.
