Automating Processes with Workflow - Maximo Version 5.2

This is a two-day workshop that focuses on how Workflow in Maximo release 5.2 can be used to improve your maintenance and inventory processes. Attendees are encouraged to bring actual processes from their site, which will be used for hands-on exercises.

- A. Overview of how Workflow functions in Maximo
- B. Review the steps necessary to use Workflow with Maximo release 5.2
- C. Discuss several illustrations of how Workflow can be used to support maintenance and purchasing business processes
- D. Does implementing Workflow make sense for your organization?
- E. Build your own workflow process
