

## Training Syllabus

---

### System Administration for IBM Maximo 6

*This two day course introduces students to the System Administration applications in IBM Maximo 6. System administrators use these applications to do the following tasks:*

- Administer and configure other Maximo 6 applications
- Set values (MAXVARS)
- Specify security settings
- Configure the database

*System Administration for Maximo 6 shows you how to:*

- Set up, control, and maintain the Maximo 6 environment
- Modify your environment as changes occur at your facility

*Prerequisites for this class include: Navigation & Querying in IBM Maximo 6/Basic Maximo 6 or demonstrable working experience with IBM Maximo 5.x or greater*

*Work Management in IBM Maximo 6 (for EAM) or demonstrable working experience with IBM Maximo 5.x or greater*

#### Course Outline
