

Training Syllabus

Maximo® 7.5 New Features

This is recommended as a four-day class that provides an overview of IBM Maximo Asset Management 7.5's new features and applications. Intensive use of hands-on exercises using a fully populated Maximo instance will provide the student with practical experience.

This course may be modified to meet the requirements and objectives of the client. Please review the course content below and discuss changes with the Projotech training advisor.

Prerequisites

Maximo 7 Basics - Navigation and Query
